

# SMARTLIFT LIFTING SOLUTIONS

**SMARTLIFT**

# ACCESSORIES

A Smartlift offers more than just lifting capabilities. You have the option to purchase ramps for simpler transport in a van, a hook for moving elements, forks for transporting pallets, tires that don't leave marks, special suction cups, a cordless remote control, among other enhancements.

For a comprehensive list of available add-ons, please refer to the accessories catalog. We are always happy to help you select the best options for your machine and business needs.

## THE MOST POPULAR ACCESSORIES

- Forks
- Hook
- White non-marking tires
- Special suction cups
- Extenders
- Custom color
- Electric key switch
- Foldable handle
- Cordless remote control
- Trackunit

# SUCTION CUPS

When you choose a Smartlift equipped with vacuum technology, it comes with SGF suction pads as standard equipment. To enhance the capabilities of your Smartlift, you have the option to purchase additional suction pads.

- 1 SGF suction pad**  
This is the standard suction pad and is suitable for lifting glass with a completely smooth and flat surface.
- 2 SPU suction pad**  
This pad handles glass with a smooth surface and can also lift elements that have minor irregularities.
- 3 SPK suction pad**  
Designed for lifting elements such as Paroc panels and other materials with a less than completely smooth surface.
- 4 FSGPL suction cups**  
These suction cups are suitable for curved and airtight surfaces.
- 5 SPLO suction pad**  
An oval-shaped suction pad, ideal for handling thin metal sheets and other lightweight materials.
- 6 Oval suction pad**  
Crafted for handling curved and uneven elements like windshields.
- 7 Protection cover**  
We recommend using protection covers for the vacuum cups when not in use. This helps to maintain lifting capacity by protecting against dust and dirt.
